ARCHITECTURAL WRAPS

Why Commercial Desk Resurfacing Is Ideal for Office Renovation

A smarter, faster, and more cost-effective approach to transforming your workspace — without the chaos of traditional demolition.

THE CHALLENGE

The Real Problem With Traditional Renovations

Old finishes rarely mean "broken" — yet standard replacement demands demo, disposal, and downtime. Every renovation becomes a major disruption: furniture removed, debris generated, and workspaces unusable for days or weeks.

🔨 Demolition

Structures torn out, generating waste and dust

🚛 Disposal

Old materials hauled away at added cost

⏳ Downtime

Spaces offline for extended periods

THE SOLUTION

Resurfacing Changes the Renovation Equation

Refurbishing applies a premium new finish **directly over existing surfaces** — no tear-out of the desk structure underneath. The original furniture stays in place while its appearance is completely transformed.

No Demo Required

The desk stays exactly where it is

Zero Structural Change

Only the surface is renewed

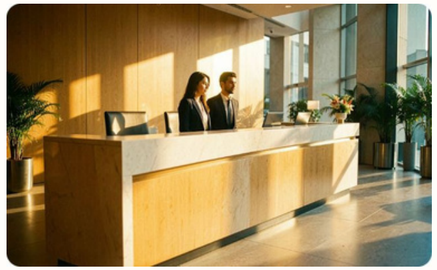
Immediate Results

Transformation in hours, not weeks

BEST APPLICATIONS

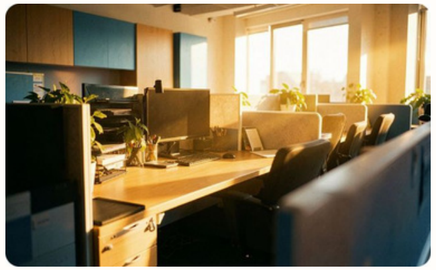
Where Desk Resurfacing Fits Perfectly

Reception areas and built-in casework are **high-visibility, high-contact zones** — and the ideal candidates for surface wraps. First impressions matter, and these surfaces define the look of your space.



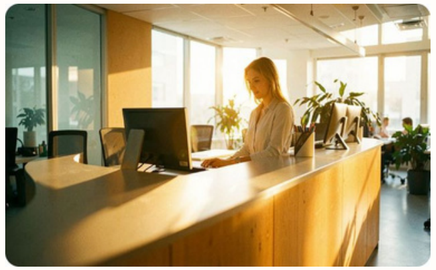
Reception Desks

The focal point of your office — resurfacing delivers a polished, premium look instantly



Built-In Casework

Fixed counters and cabinetry that can't easily be replaced are perfect candidates



Service Counters

High-traffic surfaces that need to look clean and professional every day

MATERIALS & QUALITY

What Commercial Desk Resurfacing Actually Delivers

Premium Architectural Vinyl Film

Resurface Wraps uses high-performance vinyl film that **restores desks and counters to a like-new appearance** while fully preserving the original structure. Available in a wide range of finishes — wood grains, solids, metals, and textures — to match any design vision.

- Architectural-grade vinyl with rich, realistic finishes
- Adheres smoothly to existing surfaces without gaps
- Preserves the structural integrity of original furniture

SPEED & EFFICIENCY

Faster Install = Less Disruption

1

Day for Most Projects

Many full installations are completed within a single business day

2-4

Hours for Small Areas

Individual desk surfaces can be wrapped in just a few hours

0

Days of Downtime

The space is usable immediately after installation is complete

SAFETY & COMPLIANCE

Safety + Code Compliance Isn't an Afterthought

Commercial environments demand materials that meet strict safety standards. Resurface Wraps' materials are fully certified for use in professional spaces — giving facility managers and designers complete peace of mind.

Class A Fire-Rated

Meets the highest flame-spread rating for interior finishes

UL 10B / 10C Certified

Tested and certified for commercial door and surface applications

LONGEVITY

Durability + Maintenance Built for Busy Offices

Engineered for Real-World Use

Wrapped surfaces are designed to withstand **daily cleaning, heavy foot traffic, and constant contact**. Instead of repainting or refinishing, you simply wipe the surface clean — keeping your space looking sharp with minimal effort.

Easy to Clean

Standard office cleaners work perfectly on wrapped surfaces

Scratch & Wear Resistant

Durable film withstands daily wear without fading or peeling

No Refinishing Needed

Skip the repaint cycle — wipe and go

STRATEGY

A Portfolio-Friendly Renovation Strategy

Managing multiple locations? Resurfacing can be **phased across your portfolio** without shutting spaces down one-by-one. Because the work requires no demolition, each location stays operational throughout the process.

Assess Locations

Survey sites and set priority order.

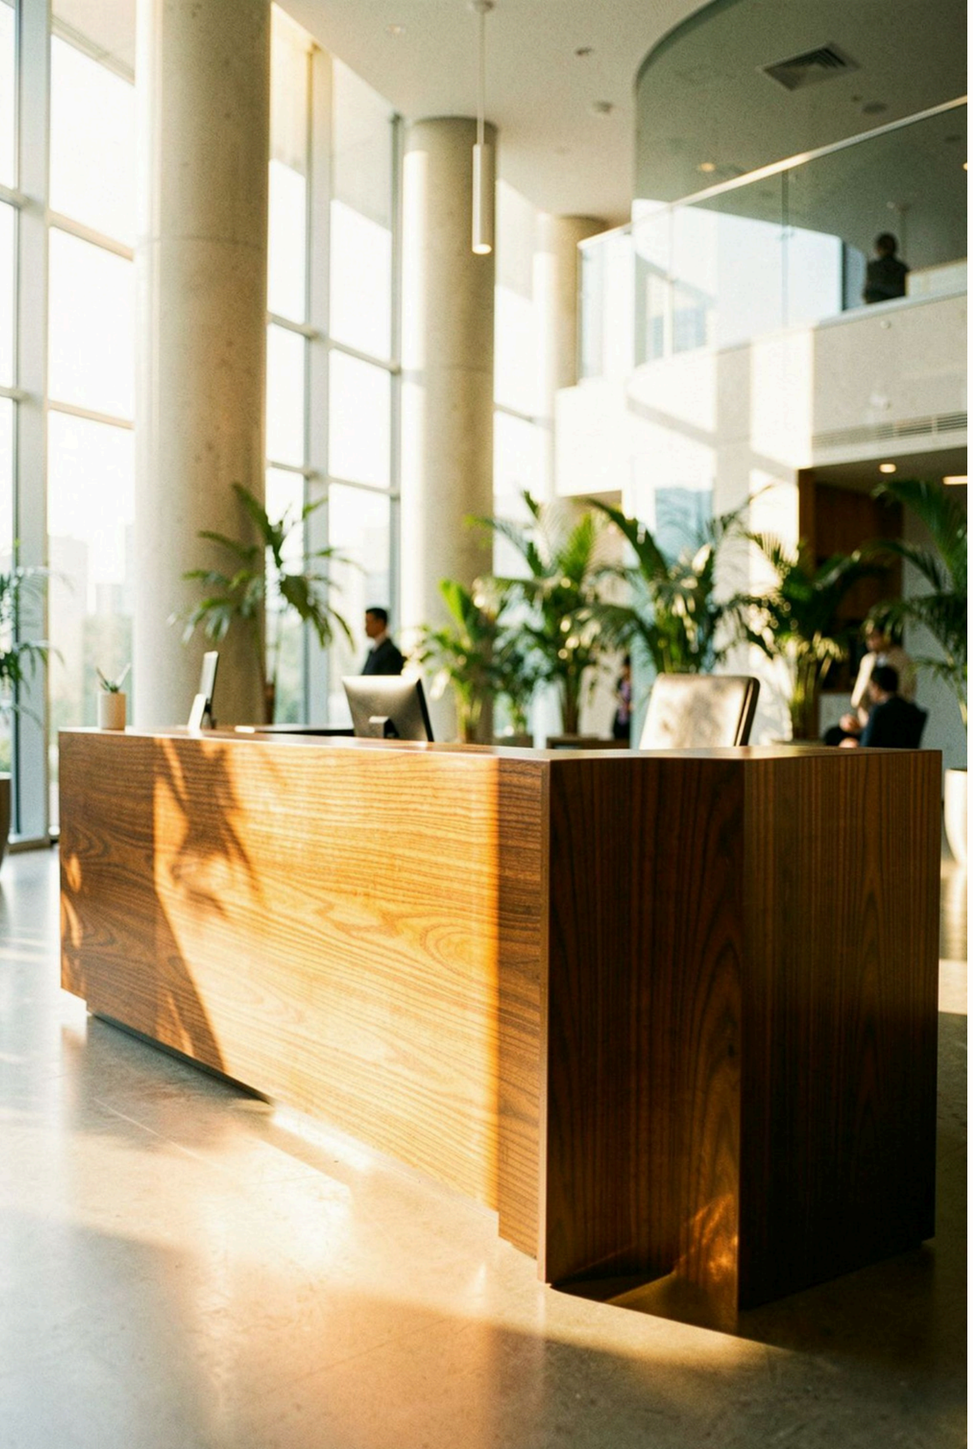
Complete Rollout

Refresh all sites with consistent branding.

Phase Scheduling

Plan wraps to minimize disruption.

This phased approach allows organizations to maintain brand consistency across locations while controlling costs and minimizing operational impact at each site.



Ready to Transform Your Reception Desk?

Upgrade your office aesthetics with minimal disruption. **Resurface Wraps** delivers professional-grade results — fast, safe, and cost-effective.
